MEMORANDUM FOR:

SUBJECT : Film Support

25X1

REFERENCE : 23 March 1970

1. As we discussed during your recent visit to NPIC, we have reviewed the procedures for providing the film support you require for your particular analytical tasks. As a part of this review, we considered the various alternatives available to us, and I'm happy to report that we have been able to settle upon one which was not discussed during your visit, but which should more than meet your requirement for both timeliness and quality.

2. Beginning with the next mission, we shall be able to provide you with a second generation duplicate positive copy of all of your twenty-five targets that are covered by a particular mission, within three, possibly four weeks, of receipt of that mission by the processor. Thus, you should receive all of your targets several weeks sooner than you do now and you will receive a second generation copy rather than the fourth generation copy you now receive.

3. I hope these arrangements will be suitable and that we can continue to provide the support and assistance in these and other matters that you require.
